GLO BOARD
FOLLOW MY WORD**

About

This Glo board gives an instant visual identifier in darkness. It recharges by exposure to the sun, ambient room light or a UV light source. Its uses safe non-toxic material which is REACH compliant.

UV LIGHT PEN

This product is supplied with a UV light pen (CE Labelled) for use with the Glo element of the product. The built in invisible ink marker should **not** be used on the Glo material or any fabric as it will permanently mark it.

The marker is suitable for use with paper or dry wipe board and reacts to UV light.

Dry Wipe Board Care

This white surface may not be compatible with all dry wipe marker pens as some may leave stains. You are therefore advised to experiment with the pens on the edge of the surface before full usage occurs. After a while, even satisfactory pens may leave some "watermark" effects – Regular cleaning with a soft, clean, damp cloth should help to minimise this and also remove any mark left by the UV pen.

Important Notes!

THE FIXINGS ON THIS PANEL, IF DISASSEMBLED, WOULD BE CLASSED AS SMALL PARTS UNDER THE EUROPEAN STANDARD **EN71 - SAFETY OF TOYS** AND THEREFORE CREATE A **CHOKING HAZARD.** THESE PANELS **MUST NOT** BE DISASSEMBLED. AN ADULT SHOULD **ALWAYS SUPERVISE PLAY!**
